Notice of Allowability	10/073,958	KITTAKA ET AL.
	Examiner	Art Unit
	William C. Choi	2873
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to <u>Response filed 9/29/2004</u> .		
2. 🔀 The allowed claim(s) is/are <u>1-23</u> .		
3. ☑ The drawings filed on 10 April 2002 are accepted by the Examiner.		
4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a)

Application/Control Number: 10/073,958

Art Unit: 2873

Allowed Claims: 1-23.

REASONS FOR ALLOWANCE

Page 2

The following is an examiner's statement of reasons for allowance: none of the

prior art either alone or in combination disclose or teach of the claimed combination of

limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in

combination disclose or teach of an optical coupling system comprising first and second

positive lenses, wherein said first lens converts Gaussian beam like luminous flux into

approximately parallel luminous flux and said second lens arranged to convert said

parallel luminous into converged luminous flux as claimed, specifically wherein a

distance 2L between the two lenses is selected to satisfy the claimed expression.

Specifically, with respect to independent claim 3, none of the prior art alone or in

combination disclose or teach of an optical system comprising a reflective surface

disposed at the rear of a positive refractive power lens, said lens converting Gaussian

beam-like luminous flux emitted from a light source into approximately luminous flux as

claimed, specifically wherein a distance between said lens and said reflection surface

satisfies the claimed expression.

CONCLUSION

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to William C. Choi whose telephone number is (571) 272-
